

Adjustable Loading Bay Gate

Create a safe working area on scaffolding loading platforms with the Hacketts Adjustable Loading Bay Gate- conform to Health & Safety on your building site.

Manufactured to conform to all Health & Safety requirements and is designed to satisfy the needs of BS EN12811-1

An essential element of any scaffolding structure the Hacketts Adjustable Loading Bay Gate enables easy loading of building materials onto the scaffold while preventing workers from accessing the loading area while the perimeter barriers are removed. Designed to a modular construction enabling it to be assembled at ground level and raised to a working height by a forklift.

Specification:

- Manufactured in high quality steel
- Fabricated to any width to suit your needs
- Standard Height 950mm - can be made to any height
- Powder Coated in Red as standard, your corporate colours available.

Features:

- Central horizontal rail and welded mesh panels at front
- Counterbalanced – easily operated by one person
- Full operator protection when in use
- Fully reversible arms incorporating rotational swivel clamps
- Provision for double guard rails at rear providing easy reach.
