

# Hop-up Bracket

Manufactured from high strength steel the Hacketts Hop-up Scaffold Bracket provides an easy solution to fill tight to the building structure when the scaffold standards are a distance away.

## Specification:

- Manufactured from High Strength Lightweight Steel - 40mm x 40mm x 3mm Steel RSA
- Secured with 2 Qty Fully Tested Tube Clamps
- Standard 2 Board Product Weight 8K
- Powder Coated in Red as standard, your corporate colours available

This is very helpful in the case of rendering the elevation as scaffold boards can remain in place during construction but removed during rendering providing greater access for tradesmen.

The standard Hacketts Hop-up Scaffold Bracket is designed to carry 2 scaffold boards. Alternative products in the range provide capacity for 1, 2 or 3 board widths.
