

## Safety Netting Pole

The Hacketts Scaffold Safety Netting Pole is an essential element on construction sites for retaining falling debris within the work site.

### Specification:

- Manufactured from High Grade Steel
- Made from 48.3 dia tube, standard length 6ft but can be made to any size as required
- Secured with two 1/2 couplers mounted opposite each other
- Powder Coated in Red as standard, your corporate colours available.

The Hacketts Scaffold Netting Pole provides an easily installed anchor to secure your netting.

As one of the leading manufacturers in the UK, Hacketts have a comprehensive range of Quality Construction Products available for prompt delivery. Bespoke items can also be designed and manufactured to your specific requirements.
