

Temporary Hand Rail Post

The Hacketts Safety Hand Rail Post provides a quick and easy way to create temporary barriers in stairwells, landings and other hazardous areas.

Specification:

- Upright 30x30x2mm box section x 1070m
- Base 130x130x6mm with corner fixing holes
- Support Hooks 30x5m with fixing holes
- Timber rails up to 40mm thick can be used or in conjunction with the Hacketts Temporary Safety Rail System
- Black Plastic End Caps
- S.I.G Approved

The Hacketts Safety Hand Rail Posts are constructed from quality steel proving a strong and secure temporary barrier post allowing conformity to Health & Safety in construction sites.

Temporary Hand Rail Posts are available in 3 variants:

- Corner Post with Base Plate
- Centre Post with Base Plate
- Centre Post with Stringer

Can be made to customer specifications depending on stairwell dimensions.
