## Temporary Stair Rail - Adjustable

The Hacketts Temporary Adjustable Safety Stair Rail is easy to install, store and remove providing a quick and sturdy protection of stairwells during building construction.

### Specification:

- Constructed from high grade steel
- The product is supplied as a kit consisting of one short and two long rails.
- Long Rail – 2500mm adjustable to 3500mm – 15KG
- Short Rail - 750mm adjustable to 1200mm – 8KG
- S.I.G Approved

Designed and constructed to provide easy stairwell protection in most design layouts, the Hacketts Temporary Staircase Safety Rail is easily adjusted to any staircase angle and is telescopic to cope with most landing and staircase runs.

As stairs and balustrades are typically installed when construction has finished in order to avoid damage, the Hacketts Temporary Rail will ensure Health & Safety Compliance during construction and fitting out.

This product can be used in conjunction with Hacketts Safety Rail Posts.
